Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2, and 4 are rejected under 35 U.S.C. 102(e) as being anticipated by Zach, Sr., US Patent Number 6,211,818 (hereinafter Zach).

Regarding claim 1, Zach discloses a method of providing location information for mobile telecommunications stations comprising the steps of: taking a measurement of the present location of said mobile station and transmitting said location to an emergency bureau; repeating said measurement after the lapse of an interval of time; and taking additional measurements as needed to trace movements of said mobile station [col. 2: lines 18-31; col. 3: lines 24-35].

Regarding claim 2, Zach discloses taking said measurements using signals derived from a Global Positioning System [col. 2: lines 22-24].

Regarding claim 4, Zach discloses automatically initiating the taking of said measurements and reporting of said measurements if an automobile containing said mobile station is started without disabling a measurement and reporting system [col. 2: lines 24-27].

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zach.

Regarding claims 3 and 5, Zach does not specifically disclose increasing the frequency of measurements if the mobile station is detected to be in motion (i.e. two previous measurements are not equal). However, the Examiner takes Official Notice that it is well known in the art to adjust the intervals between location determinations, especially if the object to be located is moving. It would have been obvious to one of ordinary skill in the art at the time of the invention to include this feature in order to more accurately and quickly locate the mobile station.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Timm et al., US Patent Number 5,890,061, disclose a vehicular emergency message system.

Hayes, US Patent Number 6,225,944, discloses manual reporting of location data in a mobile communications network

Yoshioka et al., US Patent Number 6,310,543, disclose an emergency call system.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erika A. Gary whose telephone number is 703-308-0123. The examiner can normally be reached on Monday-Thursday and alternate Fridays.
